

**The Farmington Conservation Commission and
Moose Mountain Regional Greenways**

Invasive Insects and New Hampshire Forests

Invasive Forest Pests and How to Spot Them

Featured insects will include:

Emerald Ash Borer

Asian Longhorned Beetle

Hemlock Woolly Adelgid

The health of our trees and forests are at risk. Learn about where these insects are, what tree species they attack, what to look for, efforts that are being taken to control and reduce the spread of these insects, and **how you can help**.

**Farmington Town Hall
531 Main St**

Monday, March 16, 2015

7:00-8:30 pm

Doors open at 6:30

Light Refreshments will be served

**Wendy Scribner
UNH Cooperative Extension
Natural Resources Field Specialist**

Specializing in Forestry and Wildlife, Wendy Scribner provides research-based natural resource information and assistance topics including: managing woodlots, selling timber, enhancing wildlife habitat, controlling invasive plants, and improving forest health and productivity.

Wendy is a licensed forester in both NH and Maine and holds Bachelor's and Master's Degrees in Forestry from UNH.
